MD-101 Managing Modern Desktops

Overview
This three-MOC packaged set aligned to Modern Desktop Exam: Modern Desktop Administrator Part 2 contains courseware that helps prepare students for Exams MD-101. Passing this exam is required to earn the Modern Desktop Administrator certification.

Prerequisite Comments
The Modern Desktop Administrator must be familiar with M365 workloads and must have strong skills and experience of deploying, configuring, and maintaining Windows 10 and non-Windows devices. The MDA role focuses on cloud services rather than on-premises management technologies.

Target Audience
The Modern Desktop Administrator deploys, configures, secures, manages, and monitors devices and client applications in an enterprise environment. Responsibilities include managing identity, access, policies, updates, and apps. The MDA collaborates with the M365 Enterprise Administrator to design and implement a device strategy that meets the business needs of a modern organization.

Course Objectives
Please refer to Overview.
